BLOOMSBURY

researchright

Calling all Psychology Lecturers!

Does your class struggle with stats & research methods? Introducing an online learning platform tailor-made for Psychology students to boost their skills in this challenging but vital course discipline.

✓ Build your students' confidence and independence

✓ Enable your students to grasp the theory AND practically apply it

✓ **Save you time!** Our research indicated that the greatest challenge for tutors in this area was the amount of time spent recapping material and fielding queries from students with vastly different learning needs

Student Feedback:

❝ *It helps break the mountain of coursework down into smaller steps so the student feels like they can make it out of the module without feeling behind or burnt out.* ❞

❝ *I love the abbreviated format which was simple to digest through the topic page, as well as the practice page to consolidate this learning (so it wasn't going in one ear and out the other).* ❞

❝ *Gives good practical examples to help aid learning.* ❞

Why use Research Right?

Using psychology-specific context and examples, Research Right covers the entire Research Methods & Stats curriculum for undergraduate Psychology degrees - from introductory topics to final year projects:

Theory is broken down into clear, simple topics with practical examples

Interactive exercises reinforce learning and build hands-on skills in analysing data

Popular FAQ feature provides curated, relevant answers when students need them

End-of-topic tests help you and your students to track progress

Student-friendly data analysis with StatsCloud

Free trials are available now!

Contact **researchright@bloomsbury.com** for further information to decide whether Research Right is right for your class, or to set up a free trial for the start of the Autumn term.
